# Manual

After starting the app the user can see the list of pieces he is working. Near to the title of piece user can find its status or mark of the progress in the work. The pieces are sorted in order from lowest status to highest, so piece that should be worked on more will be displayed at the top. Start screen of the app is shown at the pic. 1.

Picture 1 – start screen of the app with list of works

In order to add another piece to list, the user should click button in the right bottom of the screen. After it there will be displayd dialog alert (as shown at pic. 2), where user should type title of the piece. By default will be assigned status 1, which is the lowest (the biggest is 5). If the user types already used title the new work will not be added.

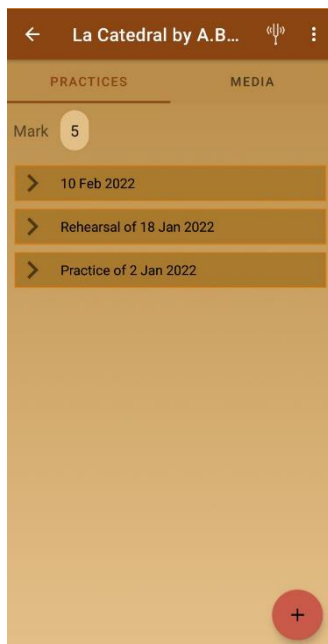

Picture 2 – dialog alert to add new work

In order to change the title of the piece the user should tap and hold needed element from the list. There will be displayed dialog alert with «edit» button (as shown at pic. 3), if clicked there will be prompt for new title of the piece.

Picture 3 – dialog alert with "edit" button

Let's go to the screen of working with exact piece (for it we need to click on the one of the pieces in the list on the start screen). There will be two tabs on screen: «Practices» and «Media». In the first there will be list of practices and mark of the status of the piece (as shown at pic. 4). Status can be changed by input new value in that field (valu can be whole number from 1 to 5 included). The interaction with list of practices is like working with pieces on the previous screen. If user needs to edit or remove element from the list, he needs to tap and hold that element. After that there will be displayed dialog alert with that two buttons (can see on pic. 5).

Picture 5 – dialog alert for editing or removing practice

In the «Media» tab (as shown at pic. 6) user can add different materials to piece. They can be video- or audio-files, PDF-files or just notes. In order to add new material user needs to click on the button in right bottom of the screen. After that there will be displayed dialog alert (as shown at pic. 7), where the type of file (material) is selected. In dependence of chosen point may be launched another app – file manager, or displayed text field for input (if the user wants to type a note). In the file manager (example shown at pic. 8) user can comfortably choose needed file. In example, if we choosed type of the file video, that files will be highlighted in default file manager of Android OS.

Editing or removing materials is in the same way as in the list of practices. Also needed to say that videos from YouTube can be materials in the app, but they are added to the app with «Share» function of app in which the video was found.

Also on this screen user can perform removing of the pieces. If the user needs this, he should click on the «Three dots» button in the right top of the screen and select «Remove Work» option (pic. 9). Needed to say that all information about practices and materials of that work will be removed from the app.

Picture 9 – menu with «Remove Work» option

On the click on a practice there will be performed transition to screen with information about it (pic. 10). There user can add video- and audio-material, PDF-files or notes as well. Also videos from YouTube can be imported.
